Profile

First-year software engineering student at Gisma University of Applied Sciences. I know the basics of Python, C++, and web development, and I like building small projects to understand how things work. I am looking for a working student position where I can keep learning and be useful to the team.

Education

Gisma University of Applied Sciences

2026 – Present

BSc Software Engineering, Berlin, Germany

Currently in my first year. Studying programming fundamentals, computer science basics, and software development.

High School Diploma

2023 – 2024

Skills

- **Programming:** Python, C++ (basics)
- **Web:** HTML, CSS
- **Tools:** Git, GitHub, LaTeX

Languages

- **Turkish:** Native
- **English:** B2 – C1
- **German:** Beginner (currently learning)

Projects

Portfolio website

HTML, CSS

A personal portfolio site built with HTML and CSS and hosted on GitHub Pages. My first time building a full web page and publishing it online.

Volume button orientation helper

C++

A small C++ program for tablets that moves the volume up and down buttons depending on the screen orientation, so they stay in a place that makes sense when the device is rotated.

“Hello World” web page

HTML

My first HTML exercise. A single page that shows a message, where I started learning how a web page is structured.

Interests

Technology, design, communication, and game development.
